DESCRIPTION

This list of middle and senior decision makers in the public sector is the most comprehensive list of its kind in Australia. All departments and organisations in local and municipal councils, state and federal government, tertiary education and health are evenly represented.

This list includes personnel capable of making or influencing purchasing decisions. They are "key" employees who are otherwise difficult to reach. This list is characterised by management who influence strategy and direction of their respective organisations. They have high disposable income, generally tertiary educated, upwardly mobile, financially secure and career driven.

This list is sourced from A-ZGovBIZ a comprehensive database of key decision makers at all levels of the public sector. Contacts can be selected by job function, number of employees, level of seniority, metro/country. The database is maintained by our team of data analysts and sits at a high 98% accuracy.

A-ZGovBIZ is committed to accurate and detailed information and because we are specialists in public sector data it is regarded as the highest quality and most comprehensive public sector data available for rental, purchase or license.
